

PrinterOn iOS Mobile Printing Apps

Bringing true enterprise mobility to users wherever they may be

The PrinterOn® Mobile Apps for iOS make printing from your iPhone or iPad as easy as printing from your desk. Whether at the office or at a public print location, the mobile apps in conjunction with the PrinterOn Enterprise platform provide various printer discovery methods, so no matter where a user is, an appropriate printer can be found or automatically presented to them. Productivity is not lost when leaving your desk or leaving the office — The mobile apps take over and bring true enterprise mobility to users no matter where they may be.

Enterprise

Presents all authorized printers for a specific user within an organization

Network

Presents all printers on the current wireless network of a device

Location

Uses the GPS function of a device to show all PrinterOn enabled printers nearby

Search

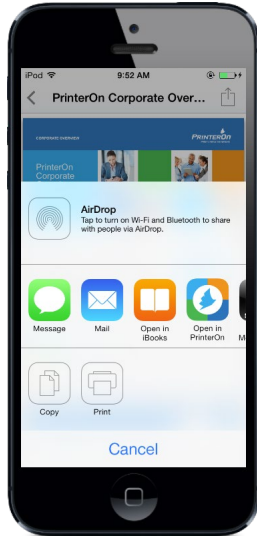

Find a printer by entering a keyword such as a city, state or hotel name

QR Codes

Scan QR code on printer to get printer details and save it for quick access when you need to print

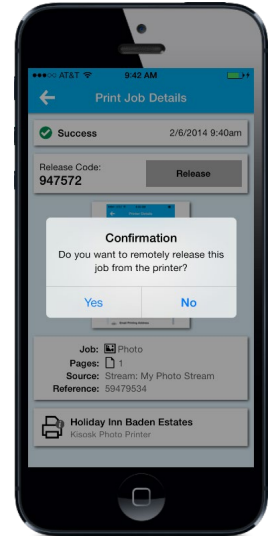

Open In

Use the "open in" feature from other applications to print file types like PDFs, Word and Excel files

Print Preview

View your document before hitting print and choose the number of copies and pages

Remote Release

Releasing documents directly from the app provides a fluid workflow and more release options
