

Table Extraction

PSIcapture Table Extraction:

Easily Extract Invoice Line Items

Every Accounts Payable department has the same challenges:

- » A never ending flow of paper invoices
- » Labor-intensive data entry
- » Constant competition with the calendar

PSIGEN's Table Extraction module provides a powerful line-item extraction technology to speed up the extraction of invoice data, providing AP personnel a quick and easy way to verify and validate data. Configuration is simple: just point and click to identify your table columns, and PSIcapture does the rest by automatically locating rows, even across pages. Once the process is complete, documents and data can be routed to your content management system or accounting system.

Vendor invoices are identified, and data located.

PSIcapture

Individual rows are extracted as records.

The results are flexibly routed to a database, accounting, or line-of-business system.

PSIGEN is the innovative leader in advanced capture applications dedicated to helping companies automate document processing by extracting data and utilizing it to name, index, format and route documents along the electronic path to storage. The lasting result is a more productive end user, using fewer mouse clicks and keystrokes, accomplishing complex and powerful document workflows.
