PSIcapture

PSIcapture Laserfiche Migration

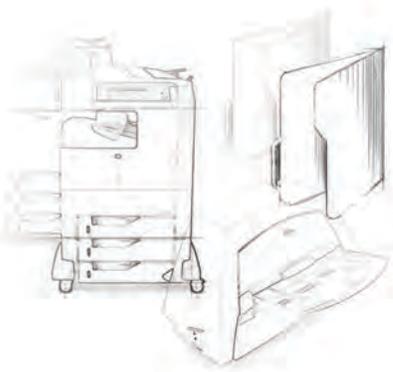

Enhance your Laserfiche ECM Solution with PSIcapture

Laserfiche is used by thousands of companies to store, access and manage documents. With organized folder structures, an effective metadata system, digital signature availability and much more, Laserfiche is an easy-to-use, efficient ECM system. PSIcapture has a convenient direct integration with Laserfiche, which provides a simple way to capture documents and automatically move them into Laserfiche.

With PSIcapture's integration, Laserfiche users can fully automate the document capture workflow, greatly reducing or even eliminating the need to perform any manual entry of index fields when filing documents into Laserfiche. PSIcapture's integration even allows users to determine everything from the structure of the documents, to naming conventions and metadata field population. Once documents are run through PSIcapture, they can be automatically exported into your Laserfiche application as fully searchable PDFs.

If your business uses Laserfiche as your ECM system, integration with PSIcapture is the optimal way to capture and route documents into your Laserfiche application. PSIcapture allows you to automate the capture and indexing process, creating a streamlined document management workflow that can increase efficiency, reduce errors, and ultimately save your business time and money.

To learn more about PSIGEN for Laserfiche, contact your reseller or PSIGEN today.

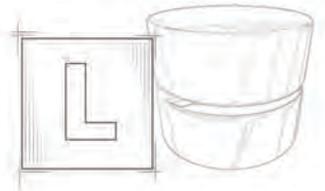

Documents are captured using traditional capture tools such as scanners, MFPs, networked scanners, or via watched folders.

PSIcapture

PSIcapture processes, separates, names, and provides folder structure.

Laserfiche

Documents are migrated to the appropriate Laserfiche vaults and tagged with metadata for searchability.

PSIGEN is the innovative leader in advanced capture applications dedicated to helping companies automate document processing by extracting data and utilizing it to name, index, format and route documents along the electronic path to storage. The lasting result is a more productive end user, using fewer mouse clicks and keystrokes, accomplishing complex and powerful document workflows.
