

BRINGING DIGITAL IN 19.0

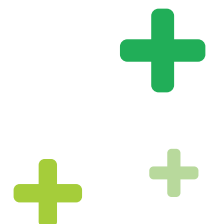

PaperCut 19 is designed to help you become a productive workplace, a digital workplace, and a simplified workplace. The best part? OCR in the cloud. It's PaperCut MF's easy to use solution that lets users search text in scanned documents on the fly. This release adds account selection at the MFD, device updates and security upgrades.

WHAT'S NEW IN 19.0

- OCR Scanning to the Cloud
- Select Accounts at the MFD*
- Evernote and pCloud added to Scan to Cloud Storage
- Operator notifications, admin rights & new Job Ticketing Mini Rooms
- Install multiple Mobility Print queues
- Setup Mobility Print guest printing for Chromebooks
- New printer discovery for Mobility Print
- A new look and feel for Reports

**Available on Fuji Xerox, HP, Konica Minolta, Kyocera, Ricoh, Sharp, Toshiba and Xerox*

ENHANCEMENTS:

* **Integrated scanning:**

- Created a new page in the Admin user interface, called “Capture”, where users now configure OCR and scan capture settings. PC-15070
- Integrated Scanning OCR now supports on-premise scanning. This suits environments with appropriate infrastructure that have restrictions for using cloud services. ACA-677
- OCR now supports over 100 languages. ACA-769
- A new “Capture” tab has been added to the Admin web interface under Options. This tab provides the ability to configure the languages that can be used during OCR processing. You can select up to 10 languages.

Note: If you’re a PaperCut Cloud OCR service Percolator customer, after you upgrade to release 19.0, you need to re-select your languages. PC-15189

- Improved scan delivery performance. PC-15127
- **PaperCut Cloud Services:**
 - › Added two data centers for hosting PaperCut Cloud Services in different regions. You are prompted to choose which one to use when you activate PaperCut Cloud Services. If you are already using PaperCut Cloud Services you can change the hosting region. ACA-622
 - › When you activate PaperCut Cloud Services you can now choose the geographic region in which the service will be hosted: USA, Europe (Germany), or Australia. PC-14962

* **Application Server:**

- Improved Application Server performance by changing the maximum number of concurrent connections allowed from 8 K to 16 K per port (configurable in server.properties). PC-11001
- Improved performance when under heavy load by adding a new connector for SQL Server 2016 to reduced database connection times. If you’re using SQL Server 2016+ and upgrading to PaperCut MF 19.0, switch to the new connector. PC-14525

* Introduced the ability to select an account for a print job at the device, for client billing or cost allocation purposes. MAC-5262

* SNMPv3 can now be used for:

- › receiving toner notifications
- › retrieving toner level information (for supported printers)
- › ‘device in error’ retrieval
- › device configuration (for supported MFDs).

For details, refer to ‘Enable SNMP’ in the Manual. PC-14922
