

Robust, automated document capture and data extraction application.

It's all about productivity

For over 20 years, PSIGEN has been perfecting simple imaging technologies to aid companies in bettering their processes and increasing productivity throughout their organizations. What started out as a simple application to help reduce receivables to under 90 days for a clothing manufacturer and improve cashflow, is now an automating powerhouse, allowing any company to enjoy measurable productivity gains.

PSIcapture has become a scalable, lightning fast, rock steady platform to meet all the information gathering needs of an organization. PSIcapture utilizes data collection and extraction options such as email capture, simple document scanning and importing, forms processing, barcodes, Zone OCR, Smart Zone OCR and many more. After automatically extracting important indexing information from documents, PSIcapture can then simultaneously publish the images and the collected data to any number of over 60 different business automation and storage solutions.

PSIcapture was also designed to be future-proof. Since PSIcapture can flexibly integrate with virtually any scanning device or document management system, a business can change their main storage or scanning systems, and still keep with the workflows established within PSIcapture. End-users will not need to change their daily habits to accommodate a new software solution or hardware vendor in other words, you can work the way you want.

Today, all companies have ongoing internal discussions as how best to use their resources. With manpower coming at a premium and people wanting to contribute more than just keystrokes and mouse clicks, PSIcapture frees a company's people to do more critical and meaningful work, as opposed to tedious data entry. For instance, companies needing simple folder trees with basic file naming conventions can harness PSIcapture's built in functionality and automate the entire process, allowing for greater productivity from their employees.

Epic Time Saving.

PSIcapture saves your one non renewable asset: man-hours.

Selected Features

To companies needing more complex workflows, PSIcapture offers a number of features to enhance and accelerate important business data processing. These powerhouse features include:

High-Performance Multi-Core OCR

Wow! That's a mouthful. Optical Character Recognition (OCR) allows a computer to read and recognize printed text at blinding speeds. This information is then employed to aid in converting images into PDF's, extracting indexing information automatically, and recognizing what type of document it is looking at. With our High-Performance OCR, you can pump up the volume and use up to 16 cores for OCR capability. What this means is, for high volume users under extreme deadlines, organizations can realize text reading boosts up to 12X normal when OCR is utilized in a workflow. Put simply, it could read and recognize the entire text of War and Peace in about 2 minutes. Shazam!

Classification

Never again separate your documents before scanning them if you want. Most of the time, PSIcapture can be trained to automatically identify and separate documents, negating the need for pre-scan separation—a HUGE time waster! It is interesting to note that this is the most requested capability for Advanced Capture products, and we just give it away for free, if you pay for everything else you need.

eMail Capture

Companies can effortlessly have emails and their attachments automatically ingested, processed, and migrated to any number of final destinations. Super-simple to set up for administrators, and no end-user training required.

Table Extraction

Want your software to automatically identify rows and columns in documents; you know, the “stuff” about the “things” you ordered? We can teach PSIcapture to extract each row as an individual record and post it to any number of places, including a database or an accounting system for easier, faster processing. We can also push the individual index fields and images to other places, at the same time, as well. Bankers and Accountants... you're welcome!

PSIfusion

Our HTML5-friendly (Read: “Web-Browser-Neutral,”) team-driven Indexing and Quality Assurance solution. For really large teams of people needing to work together, or far-flung teams with assets on the go, this is a really great way to assure those documents get processed quickly and easily. Remember, there is no “i” in team, but there are 2 in PSIfusion.

Work the way you want with **PSIcapture**
