

Print Management for HIGHER EDUCATION

ACDI PaperCutMF[®]

Give intuitive 'pay for print' solutions to your student body, and remarkable savings to your finance department.

What is it?

PaperCut MF helps you recover user print spend, empower printing from any device, and protect student records. Pair PaperCut with MFD embedded software and hardware integration to provide full print, copy, scan, and fax control.

Key Benefits

Simple to use. Get up and running in minutes.
Solve BYOD and mobile printing across all devices.
Manage spending by student, subject, or department.
Report on printer activity by student, class or department.
Designed for education.

Key Features

Print Quotas: Encourage sensible use by allocating a quota or allowance
Mobility Print: Easy, accountable Chromebook printing
Job Ticketing: Manage FabLabs, Print Rooms & 3D printing
Google Integration: Direct user syncing from G Suite
Scan to Cloud Storage: Send documents straight to Google Drive
Payment Gateways: Enable top-up via bank accounts or fund systems like PayPal

Landscape

With the average student wasting 3,200 sheets of paper every year, costs can spiral. Environmental impact can, too.

Over 2.1 million Chromebooks use PaperCut MF.

PaperCut products are trusted by colleges and universities all over the world.

Complete control over print, copy, scan & fax

Google for Education Premier Partner

PaperCut was developed to help cut costs and waste by managing printing and making it easier than ever. Now, as a Google for Education Premier Partner, we're working closely with Google to give Google for Education schools the ultimate printing experience.

- Built-in scanning to Google Drive
- Convenient user syncing in the cloud
- Super secure Google authentication

Case Studies

“can push printers to students with zero interaction on their side. They don't need their computer either; they can just open their phone and hit print en route to the printer.”

– Tron Compton-Engle, IT Director, Case Western Reserve University

“Deployment was painless, and updates require little more than a double-click... The intuitive web interface has made management a breeze.”

– Jeremiah Proctor, Technical Support Specialist, John Brown University
